How to use
1,General Function

Operation	LED Status
Power on	Blue LED flashes 2 times
Power off	Red LED flashes 2 times
Pairing	Red LED & Blue LED flash alternately
Standby	Blue LED flashes 3 times in 5 seconds
Incoming call	Blue LED flashes continuously
Low battery	Red LED flashes 2 times every 2 seconds
Charging	Red LED lights up during charging
	Blue LED flashes once when charging is complete

2, Basic Button Operation
Power on: Press the Multi-Function/Pairing mode button for 2 seconds. The Blue LED will flash 2 times indicating the headphone is on.
Power off: Press the Multi-Function/pairing mode/Turn off button for 3 seconds. The Red LED will flash 2 times indicating the headphone is turned off and in standby mode.
Adjusting Volume: Each press of the 'Volume up' or ' Volume down' buttons, will raise or lower the volume one level. When the volume reaches to the maximum or minimum sound, a clicking reminder will be heard.
Play/Pause Mode: A short press of the multifunction button will pause the music. Press the button again to restart music
Previous song: When music is playing, press the volume down button for two seconds to return to the previous song
Next song : When music is playing, press the volume up button for two seconds to go to the next song.
Answering calls: Tap the Answer Call multifunction button to answer a phone call.
End calls: Tap the End Call multifunction button to end a phone call.
Reject calls: Press 'Volume up' button for 2 seconds to reject a call.
Transferring calls: During a phone conversation, press the ' Volume up 'button for 2 seconds and your call will go back to your mobile phone . Press the 'Volume up' button for 2 seconds and call will go back to the headphone again.
Last number redial: In standby status, press headphone multifunction button twice to redial the last number called .
Call Mute function: Press the 'Volume down' button for 2 seconds, and your call will be muted. Press the 'Volume down' button for 2 seconds and the call will come back on your headphone.
**Battery Capacity status:** When headphone connects to iOS devices, iOS devices will show the headphone battery power status in the upper right corner.

To charge your headphone: Your headphone has been factory pre-charged and ready for use. Depending on conditions, the first charge might be good for short time use and in some cases it may need a recharge right out of the box.
When the battery indicator shows a low RED flashing light, please charge the headphone by putting the micro USB cable included in this package and plug it into any USB Charging device for at least 2 hours. The red LED will flash during the charging phase and the blue LED will flash when charging is complete.
Microphone function : This headphone has a built in microphone as indicated on the diagram for phone use and will work perfectly when the headphone is on your head.
3.5mm music line-in function: Connect Audio line in cable to 3.5 audio jack for wired music

3.5mm Audio Cable

3, Pairing (One headphone can connect up to two phone devices):
Make sure the headphone is power off.
Press and hold the pairing multifunctional button for 5 seconds to enter into the pairing mode.
The red & blue LED indicator light will flash alternately,

Go to your phone's Bluetooth pairing mode function and search for Floyd Rose FR-36 to connect the headphone to your phone. If you need to use a code to connect, enter "0000" as the PIN if the mobile phone asks for a pairing code..

4, 3.5mm Audio Cable use:
In some cases Bluetooth signals will not work effectively (especially in buildings where there are metal walls and users of many Bluetooth devices at once). In this case you can plug the headphone directly into your device using the included 3.5mm Audio cable.
Put one end into the headphone as shown above and the other end into the headphone jack of your device.
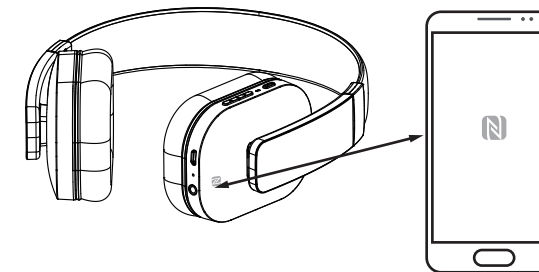

5, Pairing to a phone with NFC function:
Turn on your phone and ensure its NFC function is activated.
Turn on your FR-36 headphone.
Put your phone's NFC area the position of near the FR-36 ⓝ logo.
If your phone needs to confirm the connection, then press YES/OK on your device.

6, Sound quality with aptX® function
This headphone features apt-X function and will connect wirelessly to any aptX® enabled device to vastly improve the quality of Bluetooth streaming and delivering CD-quality sound.
